Team 1 - Marks & Feedback

Summary.md	Miss ing 0%	Low Qua lity 50%	OK 70%	Good 80%	Outsta nding 100%
Component	**0**	**1**	**2**	**3**	**4**
Clearly explain *what* you are planning to build					4
Clearly explain *who* your target users are	0				
Clearly explain *why* the product you are planning to build will be useful to the target users					4
Clearly explain *how* you are going to build it					4
Overall quality of deliverables					4
Overall insight					4

Collaboration.md	Miss-ing 0%	Low Qua lity 50%	OK 70%	Good 80%	Outsta nding 100%
Component	**0**	**1**	**2**	**3**	**4**
Reasonable records of meetings (when, who, minutes)					4
Reasonable plans for future meetings					4
Reasonable roles for each team member				3	
Reasonable decision making proposal				3	
Reasonable github/git collaboration proposal				3	

Feedback

Missing info:
- Target users → students? Any firefox user?

Report needs more detail about:
- Roles assigned to each team member
  - You listed strengths & skills, but who was assigned what?
  - I know it's too early to assign exact tasks, but each person knows their general area of strength (backend, frontend, UX/UI only etc.)
- Decision making process
  - voting? dictatorship?
- Collaboration process
  - scrum? scrum master?
- Future meetings
  - This part should mention the backlog and how it will be divided into sprints

Project idea:
- On-the-fly flashcards is a nice idea
- Multiple users supported?
- Only text supported?
  - Only text is reasonable enough, but the report needs to mention that
